^{*}Count of entrants rounded to nearest 10 qualification and subject data

Source: Office for Students -Student characteristics data: Entry

Initial observations

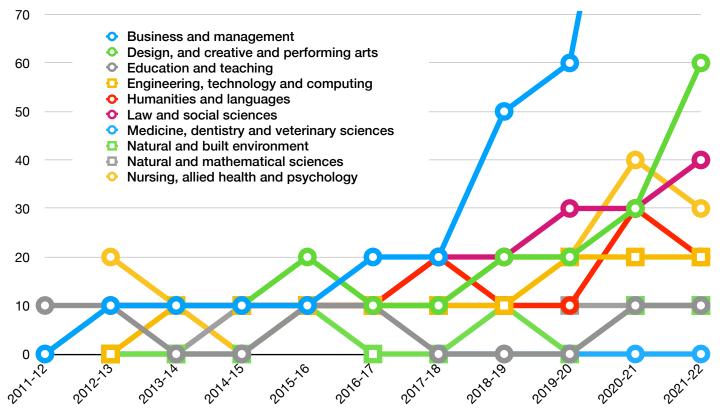

- The published figures are not student-level data; the underlying data are rounded to the nearest 10
- Hence figures of 0 in the table above probably mean fewer than 6
- In addition low data are sometimes suppressed for data protection reasons (Code DPL).
- While there is a general increase in the number of enrolments in most subject areas, the increase in business and management is quite startling and requires further investigation.
- Increased enrolment in Design, and creative and performing arts, Law and social sciences and Nursing, allied health and psychology are encouraging, but also proportionate and less surprising.
- It is disappointing and surprising that enrolments in Education and teaching, and Natural and built environment have remained low, while those in Medicine, dentistry and veterinary sciences are perhaps more understandable.
